DETAILED ACTION

Remark

1. Claims 10-14 were canceled.

Allowable Subject Matter

2. Claims 1-9, and 15-26 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Hendricks and Cobbley fails to either combine or alone to teach a method for distributing programming, wherein a first set of program according to a schedule of programming is transmitting, and a second set of programs is stored on a server, and at least one of the first set of programs having a counterpart in the second set of programs wherein the counterpart in the second set of programs is substantially identical to the at least one of the first set of programs, and the system grants program control over particular programs to the user for manipulating the progression of a particular program located on the server, and determine whether to grant control to manipulate progression of the particular program to the user as cited in claims 1, 15, 16, and 21. Hendricks mainly concern to provide a fixed programming schedule to the user, and the user is allowed to control the selection of display menu, i.e., a passive control of programs using the menu; meanwhile, the present invention allows the user *or grant the user to actively control programs over a particular under the authorization of the system* as cited in claims. Cobbley teaches the manipulation of program

segments on a preview window, but the system does not grant or deny the program control as amended therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
